SUMMARY

Results-driven MCA student specializing in Cybersecurity and Digital Forensics with strong analytical, problem-solving, and technical skills. Passionate about cybersecurity, threat analysis, and building secure digital solutions, while also developing practical expertise in Data Analytics and Web Development through hands-on projects and internships. Skilled in adapting to new technologies, collaborating in team environments, and applying technical knowledge to solve real-world challenges.

EDUCATION

2025 - present	Masters of Computer Applications - Sapthagiri NPS University	CGPA: 10.0/10.0
2022 - 2025	Bachelor of Computer Application - St. Claret College	CGPA: 8.78/10.0
2022	Class 12th CBSE	Percentage: 82.5/100

WORK EXPERIENCE

Intern - St. Claret College **Feb 2025 – Apr 2025**

Developed Claret Pulse — a digital event management platform for college fests. Reduced paperwork by digitizing student registration and data management. Worked in team-based environment, assisting with user research and feature improvements.

Intern - Karunadu Technologies **Sep 2022–Oct 2022**

Completed training in Front-end Development using Python. Developed small-scale interactive web projects and implemented responsive UI features. Implemented basic Data Science and Machine Learning Algorithms.

PROJECTS

Student Seating Preference Analysis

Tools: Python, Pandas, Matplotlib, Scikit-learn

- Analyzed the relationship between classroom seating positions and student academic performance using data science techniques.
- Performed data cleaning, visualization, and statistical analysis on collected datasets.
- Identified behavioral and performance patterns that could support optimized classroom strategies.

Password Strength Checker

Tools: Python, Regex

- Developed a password validation tool based on cybersecurity best practices.
- Implemented regex-based analysis to detect weak password patterns and improve security awareness.

Image XOR Encryption

Tools: Python, NumPy, PIL

- Implemented image encryption and decryption techniques using XOR-based symmetric cryptography.
- Demonstrated practical applications of cybersecurity and encryption concepts.

System Vulnerability Awareness Simulation

Tools: Python

- Created an educational simulation project to demonstrate keyboard activity monitoring concepts.
- Focused on cybersecurity awareness and ethical security learning.

Claret Pulse Website

Tools: HTML, CSS, JavaScript

- Designed and developed a digital management platform for college fest registrations.
- Reduced manual paperwork and improved student event coordination efficiency.

SKILLS

Programming Languages: Python, Java, HTML, CSS, SQL, NoSQL

Data Science: Pandas, NumPy, Matplotlib, Scikit-learn

Databases: Cassandra, Neo4j, MongoDB, Redis, MySQL

Tools & Platforms: Jupyter Notebook, Spyder, DBeaver, Git, VS Code, IntelliJ, MySQL Workbench, Power BI, Tableau

Domains: Data Analytics, Web Development

Soft Skills: Problem Solving, Teamwork, Adaptability, Communication, Time Management, Leadership.

CERTIFICATIONS

Python Certification - Python Essentials 2(Cisco Networking Academy)

Completed 2026

Skills: Python, OOP, Logic Building, Problem Solving

Data Science Certification – Humalitix Solutions Pvt Ltd

Completed 2022-2025

Skills: Data Analysis, Machine Learning, Data Visualization

Cisco Cyber Ops Certification

Cisco, 2025

Skills: Cybersecurity, Networking, Threat Analysis

Cisco Introduction to Modern AI

Cisco, 2025

Skills: Artificial Intelligence, AI Fundamentals
